⇒ Communication With Multihandicapped Visually Impaired Children :  
suggestions for parents and carers, available in French

## **Publications**

### **ABC-book accessible to all**

Tamarico is a small company based in Belgium. It distributes a funny ABC-book with braille and printed drawings and texts. Each letter of the alphabet is illustrated by an animal and by the letter and the name of the animal in braille. Each animal is also represented by a drawing (with colors) and by the same drawing in relief. That means that each information is available several times : printed words, braille, drawings, relief.

That book will introduce seeing children to braille and will allow them to discover some animals using their fingers only. Several kindergarden classrooms in Belgium already have that book and have tested it with success.

ABC-book is available in English, French, German and Dutch.
